Value-Added Modules

Multi-Property

Even if your operations span multiple physical locations, our Multi-Property module allows you to manage visitor access seamlessly from a single pane of glass.

You can assign staff and customers to specific properties or grant them access to the entire facility. Reports can be filtered by property or compiled to provide an overview of the entire facility.

Save time and reduce costs

- Access all your properties from a single dashboard
- Roaming staff
 - Move between Properties seamlessly
- Visitors permitted to a single Property or All Properties

Single Pane of Glass

- Granular Permissions
- Single source of reports
 - Compile reports by Facility
 - Compile reports by Property

Benefits for operators

- Comprehensive reports and analytics
- Reduced Cost
 - No need for a Tenant per Property
